Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show 1. the elements as described in the specification for Figures 1, 2 and 4. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/600,060

Art Unit: 1732

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Page 3 ·

3. Claims 1, 2, 5, 6, 7, 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by El-Soudani Pat. No. 6,029,269, col. 3, lines 36-41 and col. 4, lines 11-15.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 3, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over El-Soudani Pat. No. 6,029,269 taken together with Crescentini Pat. No. 6,219,849.
- 6. El-Soudani (col. 3, lines 36-41 and col. 4, lines 11-15) discloses the claimed process for titanium matrix composite material. Crescentini teaches the molding of plastic (polymer) protective headgear. It would have been obvious to a person of ordinary skill in the art that the thermoforming and trimming a polymer in El-Soudani since the material is superplastically formed in El-Soudani and helmets of polymer material are desired. Crescentini (col. 6, lines 4-8) teaches that the helmet can be made by an all-injection technique rather than thermoforming. It would have been obvious to mold a polymer helmet by injection molding into the basic shape shown in Fig. 4 of El-Soudani and then trim the helmet to the desired shape since the trimming of the injection molding helmet is required as taught by Crescentini (col. 5, lines 61-62)

Application/Control Number: 10/600,060

Art Unit: 1732

7. Claims 4, 8, 9, 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over El-Soudani Pat. No. 6,029,269 in view of applicant's disclosed prior art.

Page 4

- 8. Applicant discloses that helmets of many different shapes are known in the art for different functions and design. It would have been obvious to a person of ordinary skill in the art to form and remove a portion of the helmet to produce the desired shape depending upon the helmet user needs. El-Soudani teaches the trimming of the helmet to the final form. It would have been obvious to a person of ordinary skill in the art to trim a second helmet with a different shape since helmet of different trimmed shapes would be desirable for different uses.
- 9. Claims 10, 11 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over El-Soudani Pat. No. 6,029,269 in view of applicant's disclosed prior art as applied to claims 4, 8, 9, 12-14 above, and further in view of Crescentini Pat. No. 6,219,849.
- 10. El-Soudani (col. 3, lines 36-41 and col. 4, lines 11-15) discloses the claimed process for titanium matrix composite material. Crescentini teaches the molding of plastic (polymer) protective headgear. It would have been obvious to a person of ordinary skill in the art that the thermoforming and trimming a polymer in El-Soudani since the material is superplastically formed in El-Soudani and helmets of polymer material are desired. Crescentini (col. 6, lines 4-8) teaches that the helmet can be made by an all-injection technique rather than thermoforming. It would have been

Art Unit: 1732

obvious to mold a polymer helmet by injection molding into the basic shape shown in Fig. 4 of El-Soudani and then trim the helmet to the desired shape since the trimming of the injection molding helmet is required as taught by Crescentini (col. 5, lines 61-62)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill L. Heitbrink whose telephone number is (571) 272-1199. The examiner can normally be reached on Monday-Friday 9 am -2 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
